

Benefits of **BENNINGTON** Antioxidant Alkaline Water

- ① Stabilizes oxygen content in our body and immune system.
- ① Contains alkaline-rich minerals including calcium, magnesium, potassium, sodium, etc.
- ① Super antioxidant properties help to eliminate free radical damages and have anti-aging effect.
- ① Smaller water clusters hydrate and detoxify the body by flushing out toxins and acid waste more efficiently.
- ① Restores proper alkaline pH level in our body.
- ① Using Antioxidant Alkaline Water to cook improves the nutritional value and the taste of food and drinks.

BENNINGTON AWS-800's performance and operational cost savings far exceed other systems. Advantages of AWS-800 include:

1. It has 6 filters system compared to other systems with usually 2 to 4 filters;
2. It has added minerals, mainly Potassium, Sodium, Calcium and Magnesium to reduce sulphate, urate, proosphate, and other acid salts. It also helps to restore calcium in our bones.
3. Many water ionizers produce artificial alkaline water at initial high pH of 9.5 to 10.0. The pH will significantly drop below 8.0 after a few months of usage. AWS-800 guarantees pH level of 8.2 to 10.0 during the life cycle of the filters (refer to back of brochure for more details) to provide you with natural alkaline water all year round.
4. **BENNINGTON** AWS-800 does not consume electricity. Your savings on electricity compared to other systems could be as high as \$S1.00 per day or \$S365.00 in a year.
5. Our filters' cycle is much longer then others, thus reducing the operating cost. Average operating cost for a family of 4 is only \$S0.90/day.

Health Benefits of Alkaline Water as indicated by clinical research and studies in Japan, Korea and USA

HYDRATES
ANTIOXIDISES

ENERGIZES
DETOXIFIES

For Prevention with Healing Prowess of:

Eczema	Gout	Delay Aging
Allergies	Obesity	Blood Pressure
Migraines	Gastritis	Common Colds
Cholesterol	Uric Acid	Chronic Fatigue
Dehydration	Body Odor	Kidney Diseases
Osteoporosis	Constipation	Tumor and Cancer

Product : BENNINGTON Antioxidant Alkaline Water System
 Model : AWS-800
 Dimension : 383mm(H) x 288mm (L) x 215mm(W)
 Filters : 6 stage filter cartridges
 Net Weight : 6.6kgs
 pH & ORP : >pH8.2 & ORP -250mV
 Flow Rate : Up to 3L/M

Authorised Dealer:

We do not claim to offer a "cure" for any disease. If you have a serious medical condition, please see a physician of choice.

 Product of Singapore

Goodness of Alkaline Water from **BENNINGTON**

All natural alkaline water with added minerals. No ionization.

The benefits of high quality Antioxidant Alkaline Water brought to you at affordable prices.

Products Liability
\$S400,000.00
 Insurance Guarantee

Everyone deserves an essential healthy living
 Everyone deserves a **BENNINGTON** Antioxidant Alkaline Water System

Water is an important component of our body. Whenever mankind attempts to determine whether there is life present on other planets, scientists first seek to establish the presence of water, because it is one key habitability factor for survival. In general, the water composition of our body is about 65% and of the brain, it ranges between 75-78%. Water is also critical to all plants and animals, and as such, can be termed as the chemistry of life.

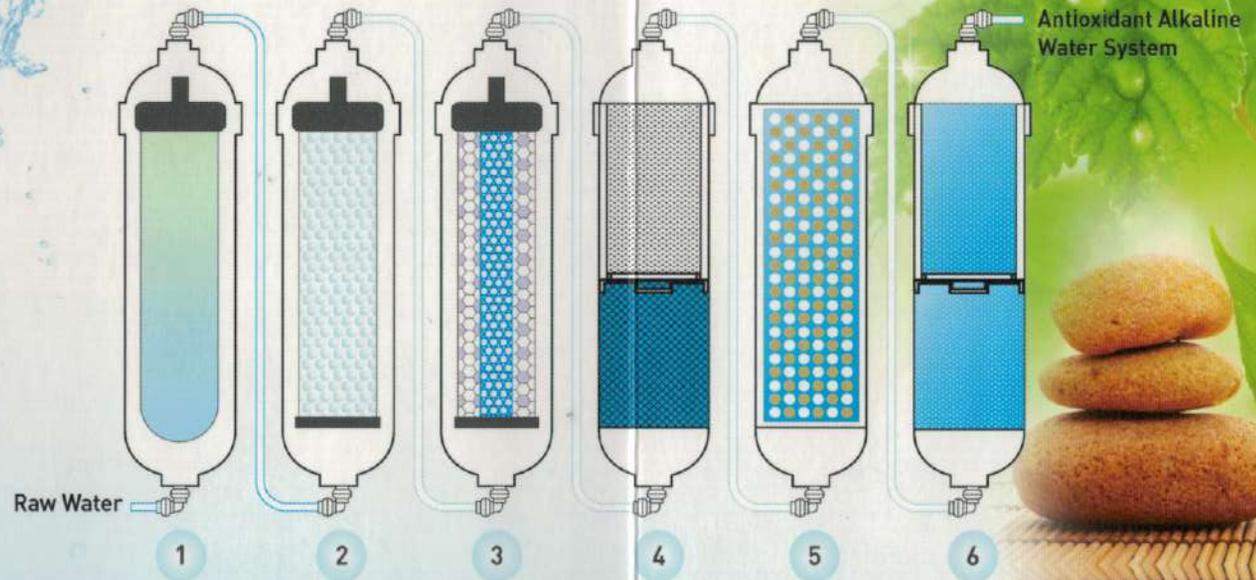

The average pH of blood inside our body is within the range of 7.35 to 7.45, and water is a key reactant in ensuring this pH level. It is also important to understand the Oxidation Reduction Potential (ORP or 'Antioxidant') of water, which create micro-clustering, antioxidant and oxygenating effects. Dr. Otto Warberg twice received his Nobel Prizes for discovering the cause of cancer, and this being the lack of oxygen or low alkaline pH. Scientists found out that healthy persons should have a body system that is alkaline and not acidic.

As such, in order to stay healthy, the best way is to prevent or conquer the free radicals in our body. The easiest way to do so is to obtain antioxidants for our body by drinking alkaline water, which is now made convenient and easily accessible.

So if you want to remove the free radicals from your body and maintain youthfulness and good health, your best choice is to drink **BENNINGTON** Antioxidant Alkaline Water.

AWS-800 BENNINGTON Alkaline Water System

1 PP Filter or Ceramic Filter (12 months)

Provide effective treatment to reduce harmful bacteria such as typhoid, bilharzia & amoebas and chemical contaminants. Remove rust, sediment, suspended solids, chlorine taste and unpleasant odour. This 0.3 micron filtration is washable.

2 Activated Carbon + GAC (12 months)

Efficient in removing pollutants such as residual chlorine, unpleasant odour, organic compounds, colours, heavy metals (e.g. copper, lead, mercury & etc), Trihalomethanes (THMS), methyl tertiary butyl ethers (MTBES) and other chemicals by absorption.

3 Activated Carbon + Alkaline Stone (12 months)

Remove heavy metals, harmful chemicals and organic materials. It is made of superior materials to ensure that water filtered is pure & clean.

4 Alkaline Media And Resin Softener (24 months)

Contains alkaline rich-minerals which are beneficial to our health such as calcium, magnesium, potassium and sodium. Alkaline media improves

the water to medium alkaline level of minimum pH8.2 and this will correct blood and body acidity. Calcium is the most important (and specific) element of bone and calcified cartilage. In humans, the total body content of calcium is mostly present in the form of bone mineral (roughly 99%).

5 Energy Ceramic, Super Tourmaline + KDF (30 Months)

The water treated with bio-ceramic is rich in ionic minerals such as calcium, magnesium, potassium and sodium. This treatment will break water into smaller molecule clusters and improve body metabolism as well as increase body resistant. It also increases dissolved oxygen content in the water for our body need. Finally KDF 55 was designed specifically for removing chlorine and water-soluble heavy metals.

6 "A" Grade Activated Carbon & Antioxidant Filter (36 Months)

Remove organic materials and resistance anti-bacteria from water. It has super antioxidant ORP of up to -250mV. Antioxidant minerals have abundance negative ions for reducing oxidation in human body, prevent free radicals, thus delay aging. Furthermore smaller water molecule clusters are easily absorbed into our body system.

*Drink Well,
Live Well*
